### Beyond Digital Capitalism: New Ways of Living Socialist Register 2021

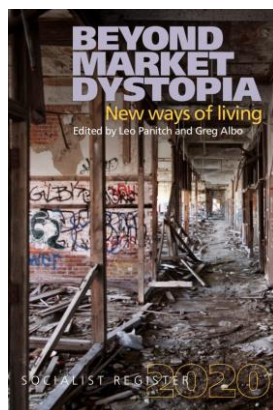

As digital technology became integral to the capitalist market dystopia of the first decades of the 21st century, it refashioned both our ways of working and our ways of consuming, as well as our ways of communicating. And as the Covid-19 pandemic coursed through the world's population, adding tens of billions of dollars to the profits of high-tech corporations, its impact revealed grotesque class and racial inequalities and the gross lack of public investment, planning and preparation which lay behind the scandalously slow and inadequate responses of so many states.

### Beyond Market Dystopia: New Ways of Living Socialist Register 2020

Connecting with and going beyond classical socialist themes, the essays in this 56th annual volume of the Socialist Register combine analysis of the severe contradictions of neoliberal capitalism in which we are living now with plans and visions for new strategic, programmatic, manifesto-oriented directions for alternative ways of living. 14 original essays locate such utopian visions and struggles in the dystopian present. 56th edition.

## The 58<sup>th</sup> edition of Socialist Register New Polarizations, Old Contradictions: The Crisis of Centrism

### Socialist Register 2022

Editors: Greg Albo, Leo Panitch & Colin Leys

The 58<sup>th</sup> annual volume of the Socialist Register takes up the challenge of exploring how the new polarizations relate to the contradictions that underlie them and how far 'centrist' politics can continue to contain them. Original essays examine the multiplication of antagonistic national, racial, generational, and other identities in the context of growing economic inequality, democratic decline, and the shifting parameters of great power rivalry. Where, how, and by what means can the left move forward?
